I first encountered the mind and vision of producer/director/movie mogul Charles Band when I was but a pre-teen via a late night screening of his classic 1982 3D monster mash PARASITE on a Toronto cable station. That film, an obvious attempt to marry the success of both ALIEN and MAD MAX with the renewed commercial interest in 3D feature filmmaking, struck a chord with me, even in its washed out, pan and scanned 2D TV print version. Here was a movie that was strong, violent, eccentric and dream-like, graced with a dose of European elegance and a textural richness aided immeasurably by its reverb-heavy Jerry Goldsmith-flavored soundtrack, provided by Band's brother and frequent collaborator Richard Band.

There was an honesty about the film, a certain classic quality and a feeling that the people behind the scenes were simply in love with making weird movies. I felt this viscerally, though at the time I could not articulate this or intellectualize it. Now, 30 years later I can.

Those ensuing post-PARASITE decades were spent immersing myself in the wild world of Charles Band, often without even knowing it. I became obsessed with his '80s Empire Pictures output, picked up on that now revered imprint's signature style (every Empire film began with the company logo, a burst of teasing pre-credits mayhem and then a slam into a dynamic opening credits sequence driven by synth-orchestral music).

Later, when I started renting movies, I fell in love with those garish big-box Wizard Video VHS releases, where beautiful Italian painted art masked the often questionable Eurotrash nuggets nestled within. I found out later, when I was deep in the thralls of obsessing over Band's second major imprint, Full Moon, that Wizard Video (among others) was Band's company and that he was instrumental in developing the world of the genre film sell through and rental industry, a format he evolved and perfected with Full Moon in the 1990s.

Literally every horror and dark fantasy loving teen I knew swore by that Full Moon logo and we rented each title indiscriminantly. It was the first time I became aware of branding in cinema and Full Moon became the motion picture equivalent to Marvel Comics for my generation, the Full Moon covers, posters and characters instantly recognizable and promising a certain kind of bizarre small-screen experience that rarely disappointed us.

Years later as I became more and more involved and ingrained in the film business on a myriad levels, the name Charles Band was omnipresent. The world changed, the business changed but no matter what twist of fate and trick of industry occurred, there was always Charles Band making strange art, there was always Full Moon, not just surviving but thriving.

Today, Band and Full Moon are still going strong and continuing to affect the mainstream with a wealth of merchandise and now, an absolutely staggering library of cult cinema that stands alone. There's no one alive, perhaps no one outside of Band's colleague and quasi-mentor Roger Corman, who has managed to navigate the often treacherous terrain of the independent horror, science fiction and fantasy film business like Charles Band and there's no surviving studio quite like Full Moon.

Here, in this remarkable book, you'll find an illustrated history of Full Moon and Charles Band's 40 years plus of making movie magic. You'll no doubt feel warmly nostalgic while leafing through its glossy pages, but you'll also get the sense of Full Moon's place in the present and its plans for the future. So with that, here's to Full Moon and its fearless leader, Charles Band. Forever may they ride...

subspecies

In 1991, *Subspecies* became the first American Film to be filmed in Bucharest, Romania. The series ran from 1991 to 1998 and followed the exploits of vampire Radu Vladislas (portrayed continually by Anders Hove) and his efforts to turn Michelle Morgan into his fledgling. The series received rave reviews with critics commending the director's choice in filming in Romania, as well as the special effects used in the film.

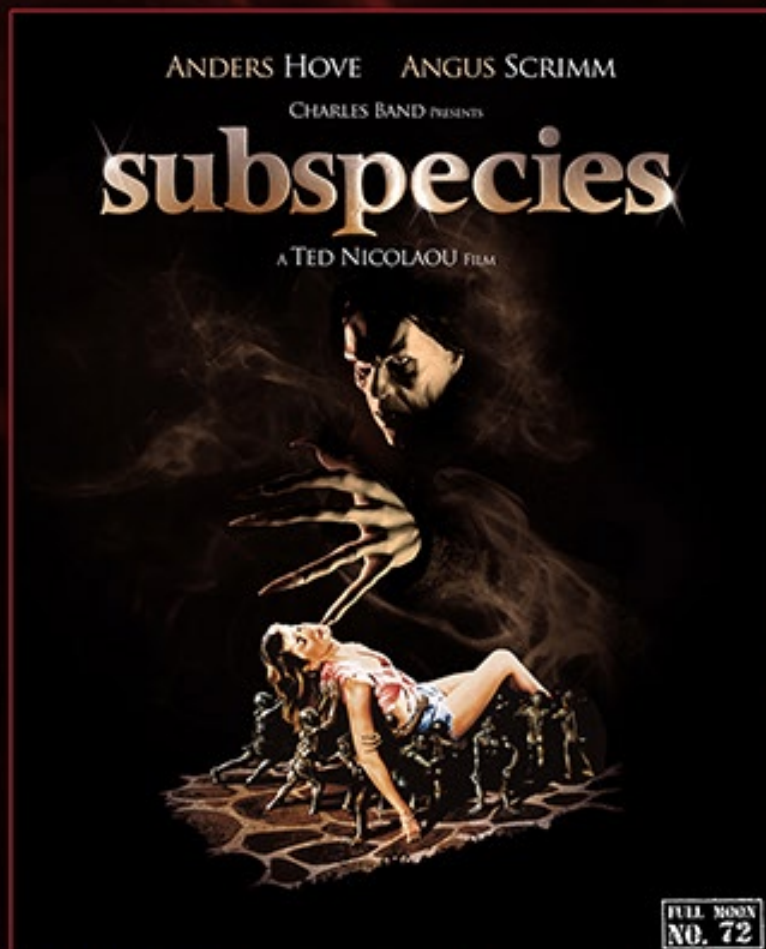

Considered by fans of the vampire genre as the most entertaining, attractive, lovingly made and emotionally engaging series of Gothic vampire films, the series began with *Subspecies* (1991).

The series concerns the fortunes of a strikingly cadaverous and charismatic Nosferatu named Radu Vladislas, and of Michelle Morgan, the American girl he initiates into the mysteries of the undead. A thousand years old, the last survivor of a 9th-Century aristocratic family (having killed all the others himself), Radu is a revelation: not just another formula bloodsucker drawn from one of the typical templates, but a complete character, understandable and even pitiable, played with ferocious energy and deep compassion by the gifted Anders Hove. Hove's Radu combines the appearance and sinister air of Max Schreck's Count Orlock (and even more closely, of Klaus Kinski in the exquisite 1979 remake) with a heartbreaking loneliness and poignancy which remind one of Charles Laughton's pathetic and touching Quasimodo and a wicked relish that is his alone.

The result is a true vampire fan's vampire, a creation that deserves immortality!

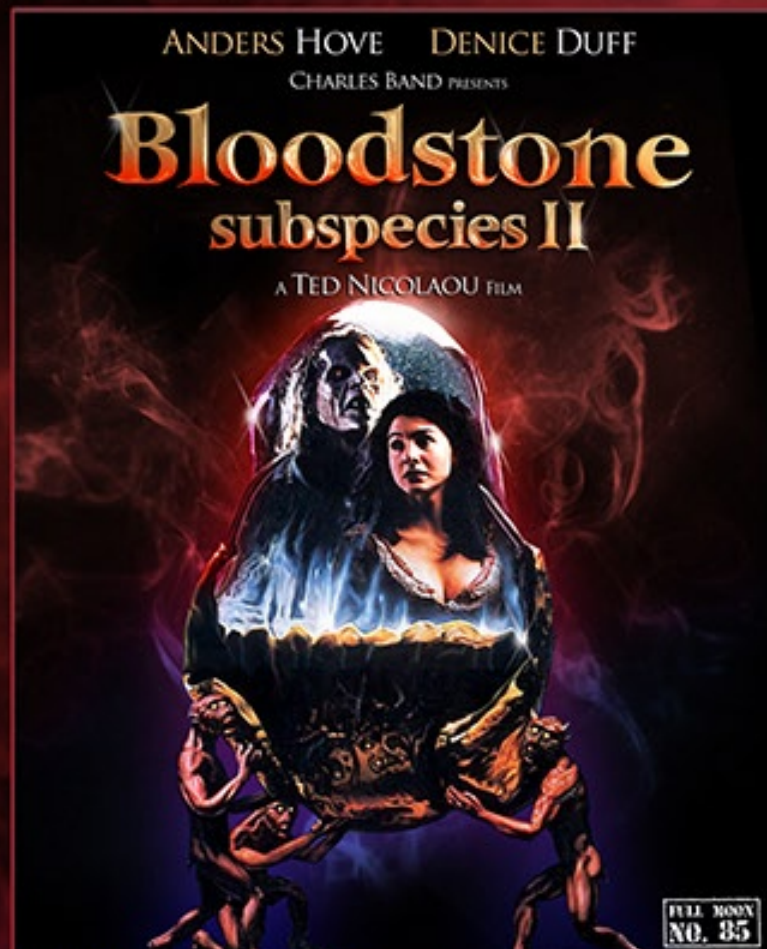

subspecies

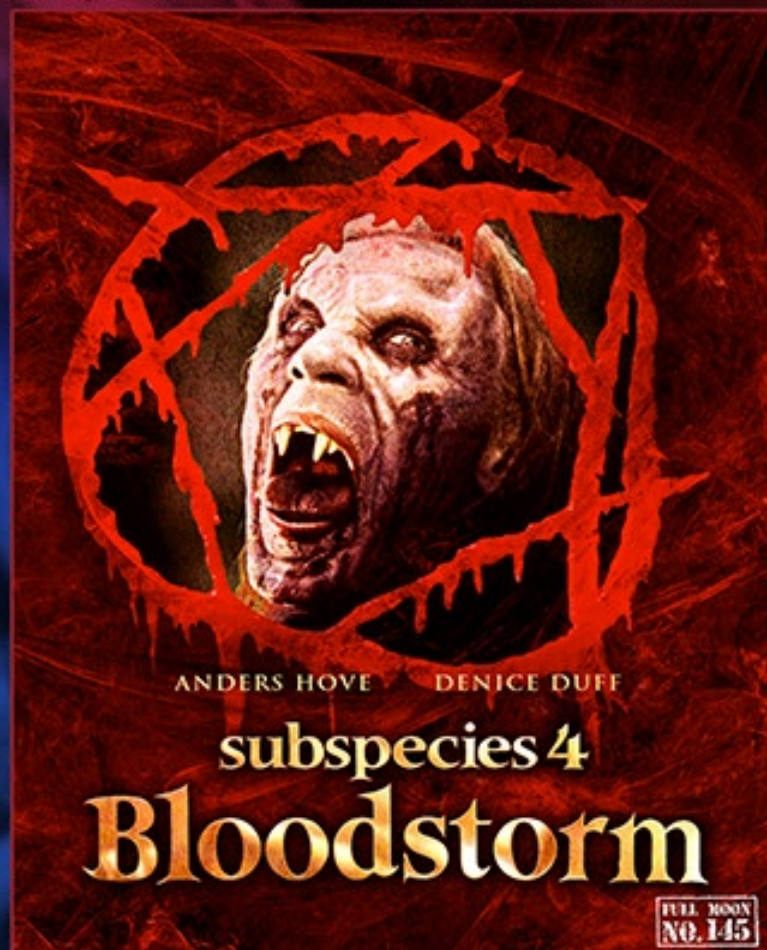

SUBSPECIES: Two American students visit Romania to study the ancient myths and legends of Transylvania. But myth turns into reality when the women become the object of desire of Radu, an evil vampire.

SUBSPECIES III: BLOODLUST: Michelle is held captive by Radu's mother. Michelle convinces Radu to teach her how to use her own vampiric powers but her sister thwarts her plan by storming the castle with a C.I.A. operative.

SUBSPECIES II: BLOODSTONE: Radu becomes obsessed with Michelle who has escaped with the Bloodstone! His evil mother, the sorceress Mummy, warns him to destroy Michelle before she destroys him.

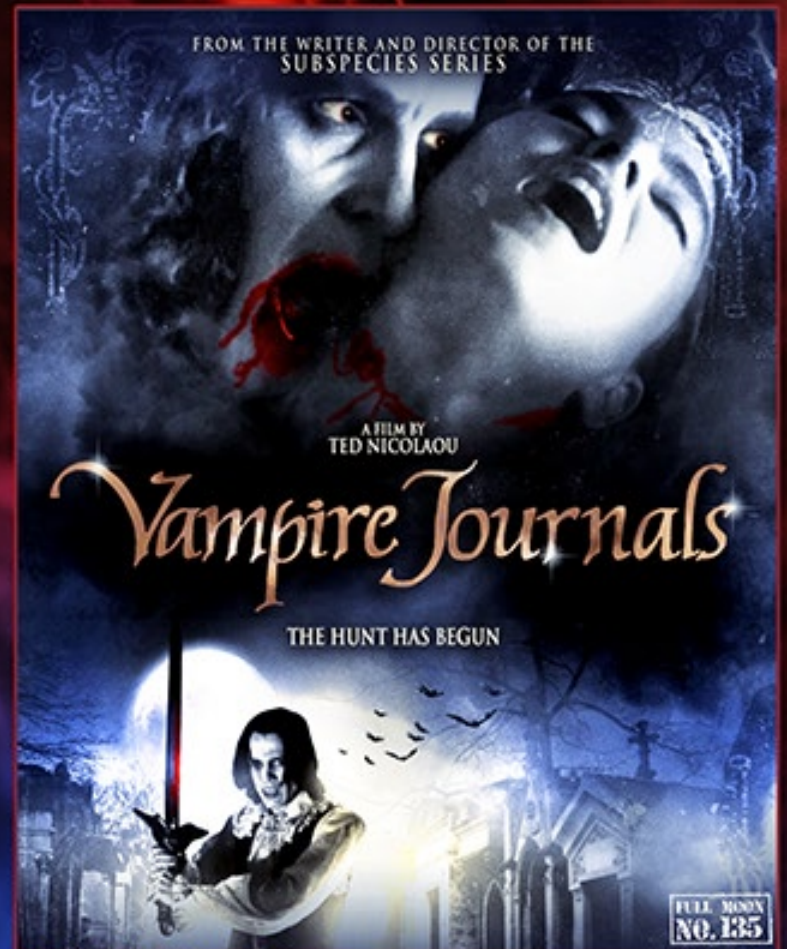

SUBSPECIES 4: BLOODSTORM: Michelle seeks a vampire slayer for relief from her bloodthirst. Radu awakens & seeks to reclaim his throne from Ash. Ash fights to protect his empire as a war of The Undead begins.

subspecies

SUBSPECIES II: BLOODSTONE: The vampire Radu becomes obsessed with Michelle who has escaped with the Bloodstone! His evil mother, the sorceress Mummy, warns him to destroy Michelle before she destroys him.

VAMPIRE JOURNALS: "I'm a vampire with a mortal heart, sworn to destroy the bloodline of he who spawned me. Ash is weak when he gives into his love of music & women. My chance to strike him down approaches..."
